

E-Soar Plus 2.1.2 for S8R receivers

X-tail version only

This template is identical to ESP 2.1.2, except that channel assignments have been modified for compatibility with the FrSky S8R stabilised receiver as follows:

- 1: Left aileron
- 2: Elevator
- 3: Motor
- 4: Rudder
- 5: Right aileron
- 6: Right flap
- 7: Left flap
- 8: [free]
- 9: Gain
- 10: mode
- 11: [free]
- 12: [free]
- 13: [free]

To configure the template, use the E-Soar Plus 2.1.2 Setup Guide which is contained in the [E-Soar Plus 2.1.2](#) package. The only change: in Section 6.2 (servo calibration), ignore the channels numbers, instead go by the channel labels (e.g. 'RtAil').
