### Description

All the artwork for a UK pegboard.  
Page 1 is the main peg-board artwork  
Page 2 contains labels for the pegs.

### Frequencies

The main R/C aircraft channels for the UK are supported. These comprise thirty-six channels on 35 MHz numbered 55 thru 90, and eight 27 MHz channels named after colours (UHF frequencies, and split frequencies on 27 MHz are not supported as is common practice).

### Construction

Make the pegboard out of 3 mm ply or similar. Allow 20 mm extra overlap on each side, so the pegs clip onto the board and not the overlay itself, otherwise the lettering will wear away rapidly.

Cut and paste the 35 MHz channels to the top of the board, and the 27 MHz channels immediately underneath. 3M Photomount is ideal for pasting, an alternative would be PVA but don't overdo it or the paper will wrinkle. Cover the board with transparent Fablon or similar.

The pag labels are are glued to the jaws (not the stems) of the peg with PVA, then coated in varnish.

### Printing

The overlay is designed around the Great British Wooden Clothes Peg and dimensions are fairly critical. If printing from Acrobat, remember to set the scale to 100% in the Print dialog

### Editing

I can supply in Visio format if required, all I ask is that any amendments be submitted back to me to be added to the web site.

### Web site

Further copies of this PDF can be downloaded from [www.rc-soar.com](http://www.rc-soar.com).
